

Frederick Douglass Recreation Center

Cleveland, Ohio

PROJECT FACTS

Owner: City of Cleveland
Architect: ThenDesign Architecture (TDA)
Location: Cleveland, Ohio

Construction Type: General Contractor
Project Size: 40,000 SF
Contract Value: \$15 Million
Completed: October 2021

KEY FEATURES

Dunlop & Johnston, Inc. is providing General Contracting services to complete this \$15 million addition. The project consists of two pre-engineered metal buildings, which will serve as a gymnasium and pool house. The pool building will hold a 4-lane lap pool, children's pool, lifestyle pool, and a water slide. A traditional build nestled between the two pre-engineered buildings will house the recreation and locker rooms.

This project is demonstrative of our estimating capabilities and strong subcontractor relationships, as our Chief Estimator won this public bid for us. Additionally, we are exceeding the project's diversity goals, while our team safely and successfully works in an active setting.

Parking lots, lighting, walkways, and pathways are an integral part of the project. Construction just started and is scheduled to be completed by December 2021.

There's a reason we've been in business for over 100 years
